

# Gamma Radiography Camera Carrying System

## **Gamma radiography camera carrying system** **For Gam 80 and 120**

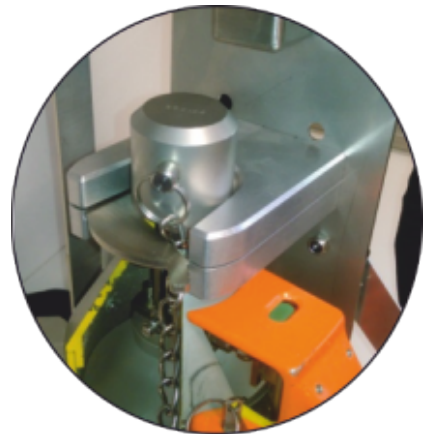

- Makes transport in caged ladders and difficult crossings easier
- Mechanical and secure locking system for the gamma radiography camera
- Weight 5 kg

Review date: 24th May 2019

## Technical Characteristics

304L stainless steel frame

## Application & Use

Primarily designed for climbing ladders and caged ladders.  
Hands free carrier to allow the user full mobility and safety.  
Compatible with Cegelec / Actemium GAM80 and GAM120 gamma radiography cameras.  
Due to the radiation emitted by the gamma radiography camera, it is advisable not to use the device for extended periods others than when using ladders and caged ladders.
